

USAIPO1979-1127G

Country: United States
Title: Gallup Poll # 127G
Survey The Gallup Organization
Sponsor:
Field Dates: April 6-9, 1979
Sample: National Adult
Sample Size: 1,509
Sample Notes:
Interview method: Face to Face
Weight Location: Column 1
No. of records
per respondent: 1

Usage Notes:

Please note that data purchased from The Roper Center for Public Opinion Research may not be redisseminated without written permission. The results of any analyses conducted on the data may, however, be published with appropriate acknowledgments and source citation.

STORRS, CONNECTICUT 06268

SAMPLE INFORMATION

1. POPULATION UNIVERSE: ADULT CROSS-SECTION-NATIONAL
2. SAMPLING TECHNIQUE: MODIFIED PROBABILITY
3. SAMPLE SIZE; 1509
4. METHOD OF SAMPLING:
All gallup polls since 1950, excluding certain special surveys, have been based on a national probability sample of interviewing areas. Refinements in the sample design have been introduced at various points in time since then. however, over this period the design in its essentials has conformed to the current procedure, as follows:
 1. The United States is divided into seven size-of-community strata: cities of population 1,000,000 and over; 250,000 to 999,999; and 50,000 to 249,999; with the urbanized areas of all these cities forming a single stratum; cities of 2,500 to 49,999; rural villages; and farm or open country rural areas.
 2. Within each of these strata; the population is further divided into seven regions: New England,

Middle Atlantic, East Central, West Central, South, Mountain, and Pacific Coast.

3. Within each size-of-community and regional stratum the population is arrayed in geographic order and zoned into equal-sized groups of sampling units.

4. In each zone, pairs of localities are selected with probability of selection proportional to the size of each locality's population--producing two replicated samples of localities.

5. Within selected cities for which population data are reported by census tracts or enumeration districts, these sample subdivisions are drawn with probability of selection proportional to the size of the population.

6. For other cities, minor civil divisions, and rural areas in the sample for which population data are not reported by census tracts or enumeration districts, small, definable geographic areas are drawn, with the probability of selection proportional to size where available data permit; otherwise with equal probability.

7. Within each subdivision selected for which block statistics are available, a block or block cluster is drawn with probability of selection proportional to the number of dwelling units.

8. In cities and towns for which block statistics are not available, blocks are drawn at random, that is, with equal probability.

9. In subdivisions that are rural or open country in character, segments approximately equal in size of population are delineated and drawn with equal probability.

10. In each cluster of blocks and each segment so selected, a randomly selected starting point is designated on the interviewer's map of the area. Starting at this point, interviewers are required to follow a given direction in the selection of households, taking households in sequence, until their assigned number of interviews has been completed.

11. Within each occupied dwelling unit or household reached, the interviewer asks to speak to the youngest man 18 or older at home, or if no man is at home, the oldest woman 18 or older. This method of selection within the household has been developed empirically to produce an age distribution by men and women separately which compares closely with the age distribution of the population. It increases the probability of selecting younger men, who are at home relatively infrequently, and the probability of reaching older women in the household who tend to

be under-represented unless given a disproportionate chance of being drawn from among those at home. The method of selection among those at home within the household is not strictly random, but it is systematic and objective and eliminates interviewer judgement in the selection process.

12. Interviewing is conducted at times when adults are most likely to be at home, which means on weekends or if on weekdays, after 4:00 P.M. for women and after 6:00 P.M. for men.

13. Allowance for persons not at home is made by a "TIMES-AT-HOME" weighting procedure rather than by "CALL-BACKS." This procedure is a standard method for reducing the sample bias that would otherwise result from underrepresentation of persons who are difficult to find at home.

14. The pre-stratification by regions is routinely implemented by fitting each obtained sample to the latest available census bureau estimates of the regional distribution of the population. Also minor adjustments of the sample are made by educational attainment (by men and women separately), based on the annual estimates of the census bureau derived from their current population survey. The sampling procedure described is designed to produce an approximation of the adult civilian population living in the United States, except for those persons in institutions such as prisons or hospitals

15. Percentages presented for each variable are weighted and exclude missing values. Frequencies

are unweighted and are given for all values.

5. Response data:
- Rporc response data file is in EBCDIC format on tape. Data have been cleaned and the final code is numeric (0-9). Stray punches have been recoded as the "NO CODE OR NO DATA" response. Tapes may be ordered according to the following options:
- A. 9 track - 800, 1600, 6250 BPI

NAME-AP/DIS CARTER HANDLE JOB

LOC 5

WIDTH 1

MD = 0 or GE 4

Q1. Do you approve or disapprove of the way Carter is
handling his job as President?

40.5 607 1. Approve

45.9 708 2. Disapprove

13.7 194 3. No Opinion

VAR 4

NAME-CONSTRUCT NUCLEAR POW PL

LOC 6

WIDTH 1

MD = 0 or GE 3

Q2. Have you heard or read about the discussion
concerning the construction of nuclear power plants?

89.8 1371 1. Yes

10.2 137 2. No

1 0. No Answer

VAR 5

NAME-IMPT MORE NUC POWER PLTN

LOC 7

WIDTH 1

MD = 0 or GE 6

Q3. In order to meet the future needs of the nation,
how important do you feel it is to have more nuclear
power plants--extremely important, somewhat important,
not too important, or not at all important?

29.7 459 1. Extremely important
33.1 503 2. Somewhat important
13.6 208 3. Not too important
16.8 246 4. Not at all important
6.9 93 5. No Opinion

VAR 6

NAME-NUC POW PLANTS SAFE

LOC 8

WIDTH 1

MD = 0 or GE 4

Q4. Do you feel that nuclear power plants operating
today are safe enough with the present safety
regulations, or do you feel that their operations should
be cut back until more strict regulations can be put
into practice?

23.4 366 1. Safe enough
66.2 983 2. Cut back operations
10.4 160 3. No Opinion

VAR 7

NAME-5-MILES NUC PLNT CONSTRC

LOC 9

WIDTH 1

MD = 0 or GE 4

Q5. As of today, how do you feel about the construction
of a nuclear power plant in this area--that is, within
five miles of here? Would you be against the
construction of such a plant in this area, or not?

60.4 906 1. Would be against
33.1 513 2. Would not
6.5 90 3. No Opinion

VAR 8

NAME-THREE MILE ISLAND HEARD?

LOC 10

VAR 10

NAME-FAV/OPP SHUT DOWN NUKES?

LOC 12

WIDTH 1

MD = 0 or GE 4

Q6c. Would you favor or oppose shutting down all nuclear plants at this time?

24.8 347 1. Favor

64.4 966 2. Oppose

10.7 147 3. No Opinion

49 0. No Answer

VAR 11

NAME-SITUATION HANDLED WELL?

LOC 13 WIDTH 1 MD = 0 or GE 4

Q6d. Do you think the situation was or was not handled
as well as possible?

45.3 669 1. Was
42.5 617 2. Was not
12.2 174 3. No Opinion
49 0. No Answer

VAR 12

NAME-SITUATN LIKELY HAP AGAIN

LOC 14 WIDTH 1 MD = 0 or GE 4

Q6e. Do you think a situation such as this is or is not
likely to happen again?

75.3 1087 1. Is
18.0 279 2. Is not
6.7 94 3. No Opinion
49 0. No Answer

VAR 13

NAME-GREATER RISK TO NATION

LOC 15 WIDTH 1 MD = 0 or GE 4

Q6f. Some people feel that nuclear power is essential
to meet the energy needs of the nation in view of a
dwindling supply of petroleum and the higher cost for
this kind of fuel. Which do you think presents the
greater risk to the nation--the presence of nuclear
plants or the energy shortage that might result if these
plants were eliminated?

30.7 453 1. Presence of nuclear plants
56.5 875 2. Energy shortage that might result
12.8 181 3. No Opinion

VAR 14

NAME-WILLING PAY HIGHER PRICE

LOC 16

WIDTH 1

MD = 0 or GE 4

Q6g. If the development of nuclear power were to be reduced in the immediate years ahead, we would have to rely on other sources of energy such as coal and oil, which in turn could increase the amount of money the consumer would have to pay for electricity. Would you, yourself, be willing to pay higher prices for electricity in order to reduce the nation's dependency on nuclear power, or not?

- 41.0 603 1. Yes, willing
- 49.7 768 2. No, not willing
- 9.4 138 3. No Opinion

Q7. I am going to read you a list of institutions in American society. Would you tell me how much confidence you, yourself, have in each one--a great deal, quite a lot, some, or very little, Just read off the letter.

VAR 15

NAME-FUTURE OF THE U.S.

LOC 17
