[Practical Information](#)

Program - June 15, 2012	
8:15-9:00	Coffee-Continental breakfast
	Session I
9:00-9:40	Patrik Guggenberger, UC San Diego Paper: "On the Asymptotic Size of the LM and CLR Test without Identification Assumptions", (joint with D. Andrews)
9:40-10:20	Anna Mikusheva, MIT Paper: "A Geometric Approach to Weakly Identified Econometric Models" .
10:20-11:00	Coffee Break
	Session 2
11:00-11:40	Andres Aradillas-Lopez, Wisconsin Paper: " Inference in Generalized Conditional Moment Inequality Models".
11:40-12:20	Ivan Canay, Northwestern Paper: "Specification Test in Partially Identified Models Defined by Moment Inequalities", (joint with F. Bugni and X. Shi).
12:20-2:00	Lunch
	Session 3
2:00-2:40	Joerg Stoye, Cornell Paper: "Nonparametric Analysis of Random Utility Models: Testing" .
2:40-3:20	Bryan Graham, Berkeley Paper: "Homophily and Transitivity in Dynamic Network Formation".
3:20-4:00	Coffee Break
	Session 4
4:00-4:40	Elie Tamer, Northwestern Paper: "Inference in a Finite Mixture Model with Applications to Experimental Data".
4:40-5:00	Break
5:00-6:00	Chris Sims, Keynote Speaker Princeton University Paper: "Foundations"
6:30-9:30	Dinner and Drinks Triumph Brewery Nassau Street Princeton, NJ
Program - June 16, 2012	
8:15- 9:00	Coffee-Continental breakfast
	Session I
9:00-9:40	Victor Chernozhukov, MIT Paper: "Inference on Treatment Effects After Selection Amongst High-Dimensional Controls",

	(joint with Alexandre Belloni and Christian Hansen).
9:40-10:20	Azeem Shaikh, Chicago Paper: “On the Testability of Identification in Some Nonparametric Models with Endogeneity” , (joint with I. Canay and A. Santos).
10:20-11:00	Coffee Break
	Session 2
11:00-11:40	Matias Cattaneo, U of Michigan Paper: "Robust Nonparametric Bias-Corrected Inference in the Regression Discontinuity Design", (joint work with Sebastian Calonico and Rocio Titiunik).
11:40-12:20	Andres Santos, UCSD Paper: “Semiparametric Estimation of Invertible Models”.
12:20- 2:00	Lunch
	Conference Ends

This event is part of the CEME and sponsored by NSF, NBER, and ERP
