

Charles Brown is an empirically-oriented labor economist. He received his PhD from Harvard in 1974, and taught at the University of Maryland from 1975 to 1985. In 1985 he came to the University of Michigan as Professor of Economics, and Research Scientist in the Survey Research Center. His is also a Research Associate at the National Bureau of Economic Research.

His research has focused on a wide range of topics such as compensating differentials, effects of minimum wage laws and of EEO policies, the determinants of enlistment and re-enlistment in the military, the relationship between employer size and labor market outcomes, and measurement error in survey data. Current work focuses early-retirement "windows", and consequences of the relatively equal opportunity in the military for children of black soldiers
