### INTRODUCTION

The Internal Revenue Service 1984 Tax Model File (94,385 records) was selected as part of the Statistics of Income program that was designed to tabulate and present statistical information for the 99,438,708 Form 1040, Form 1040A, and Form 1040EZ Federal Individual Income Tax Returns filed for Tax Year 1984.

The Tax Model files which have been produced since 1960 consist of detailed information taken from actual tax returns. The public use versions of these sample files are purchased in an unidentifiable form, with names, Social Security Numbers (SSN), and other similar information omitted. The primary uses made of these files have been to simulate the administrative and revenue impact of tax law changes, as well as to provide general statistical

The Individual Tax Model File is designed for making national level estimates. The 1984 Tax Model File can be purchased through the Internal Revenue Service, Statistics of Income Division. Any questions concerning the cost and acquisition of the current tax model file should be directed to:

Dr. Fritz Scheuren, Director Statistics of Income Division D:R:S Internal Revenue Service 1111 Constitution Ave., N.W. Washington, D.C. 20224 (202) 376-0216

In order to preserve the character of the microdata file while also protecting the identity of individuals, we have incorporated the following procedural changes in the Individual Tax Model.

Then, all of the high income returns have been sorted from largest to smallest for the field of state and local income tax deductions. In this field, for every three records, in descending order, the average state and local income tax deduction has been determined and that value has been placed in the state and local income tax deduction field for each of the three records. This has been done over that part of the sample containing non-zero values in these fields. If the last group of records contains less than three, these records have been combined with the group of three immediately before it. This method of disguising data is called blurring. The field for personal property tax deductions has also been blurred exactly as described above for all high income returns.

High income returns have then been separated into 35 different classes based on age, marital status, the number of children living at home, and the size of salaries and wages. Within each of these 35 classes, returns have been sorted on salaries and wages. This field has then been blurred over consecutive records as described above for state and local income tax deductions. However, records have only been averaged with other records in the same class. Therefore, records within one of the 35 classes have not been averaged with records in any of the other 34 classes. The file is then sorted on real estate tax deductions (again, within the 35 classes), and the same blurring procedure has been repeated for real estate tax deductions. 1/

Third, all lower income returns (records with an adjusted gross income of less than \$200,000 and not from our 100 percent sample) have been sorted by State. After this sort, the records have been blurred for real estate tax deductions, alimony paid, alimony received, and state and local income taxes (State of Wisconsin, only, for this last item) in the same manner as described above. The only difference between these records and the high income returns is that the lower income returns have been sorted for each field by individual State with no records from two different states being combined when averaging a field over a series of records.

 $\frac{1}{F}$  for greater details on this and other disclosure protection techniques used by the Statistics of Income Division, see:

Strudler, Michael; Oh, H. Lock; and Scheuren, Fritz. (1987)
"Protection of Taxpayer Confidentiality on the IRS Tax Model." Statistics of Income and Related Administrative Record Research: 1986, Internal Revenue Service.

Fourth, for all records on the file, the following changes have been made:

The fields containing total miscellaneous deductions, other net income less loss and total taxes paid deductions have been deleted and marked as "reserved." Motor vehicle tax deductions and general sales tax deductions have been combined and placed in the field for general sales tax deductions. For high income returns, this combined field has been blurred. Also, all fields on the file have been rounded to the four most significant digits (e.g. \$14,371 = \$14,370 and \$228,867 = \$228,900).

Individual Tax Model Files for each of the Tax Years 1966 through 1978, and State Tax Model Files for Tax Years 1977 and 1978, are available through the National Archives and Records Service. Questions concerning cost, acquisition, and delivery of these historical tax model files, should be addressed to:

Machine Readable Archives Division National Archives and Records Service General Services Administration Washington, D.C. 20408 (202) 523-3267

The Archives order number for any of the above-mentioned historical Tax Model files is 374-109-(A). In addition to the order number, the requestor should also specify the tax year and version (Individual or State) of the file under consideration.

Please refer to the sections of this booklet titled "Individual Tax Model Sample Description" for a more detailed discussion of the Tax Model file.

EXPLANATIONS OF ELEMENTS IN THE TAPE FILES

# EXPLANATIONS OF ELEMENTS IN THE TAPE FILES

The following explanations define data elements contained in the 1984 Individual Tax Model File that have not been abstracted directly from a specific line on Forms 1040, 1040A, 1040EZ or the accompanying Schedules and Forms. Element numbers not appearing in this section have been entered on the specific lines on the forms or schedules from which the data were abstracted. Refer to the "1984 Federal Tax Forms" section of this booklet for further information.

Element Number	<u>Definition</u>
37	Zero Bracket Amount This amount was limited to the smaller of the statutory limit or Taxable Income (E39).
38	Taxable Income, Old Concept This is a computed amount equal to Adjusted Gross Income minus (Zero Bracket Amount or Total Itemized Deductions) minus Exemption Amount, but never less than zero. This concept does not include the Zero Bracket Amount, and as such is comparable to taxable income as shown for Tax Years prior to 1977. See (E39).
39	Taxable Income This is a computed amount equal to Adjusted Gross Income minus Excess Itemized Deductions (or plus unused Zero Bracket Amount) minus Exemption Amount. This concept includes the Zero Bracket Amount (Equivalent of the former Standard Deduction) and is thus not comparable to taxable income as shown for Tax Years prior to 1977. See (E70).
41	Computed Regular Tax This is a computed amount arrived at by applying the tax rate schedules to taxable income, without regard to the type of computation used by the taxpayer.
43	Income Subject to Tax (Old Concept) Income Subject to Tax minus the Zero Bracket Amount.
44	Income Subject to Tax For taxpayers using the regular, alternative, or maximum tax computation methods, income subject to tax was the same as taxable income. For taxpayers using the income averaging method (Schedule G), income subject to tax was a reduced amount of taxable income computed for the statistics by working backwards from the tax itself.

1	Element Number 54	Definition  Earned Income Credit Used to Offset Income Tax Before Credits This amount was computed based on the lesser of: Earned Income Credit  (EXCLUSIVE FORCES Credits Prints all credits except the
		Earned Income Credit.
	56	Total Tax Credits (SOI) Total credits from Form 1040 or 1040A plus the amount of Earned Income Credit used to offset Income Tax before Credits.
ļ	58	Total Income Tax Element (59) plus element (61).
	59	Income Tax After Credits (SOI) Income Tax after Credits from Form 1040 or 1040A minus the amount of Earned Income Credit used to offset income tax before credits.
ı	60	Marginal Tax Base This is the amount of income subject to tax at the highest tax rate applicable to the return (TXRT).
	66	Total Tax Payments Total payments from 1040 or 1040A minus the total Earned Income Credit.
	76-77	If Earned Income Credit (EIC) is greater than Income Tax Before Credits (E42), the following fields are computed:
		76 - Earned Income Credit used to offset all other taxes.  This value depends on whether the difference between EIC and EIC used to offset Income Tax Before Credit (E54) is less than the value calculated by Total Tax Liability minus Income Tax After Credits minus Advance Earned Income Credit payments.

If it is less than this value, this field equals EIC minus E54. Also, E77 equals 0. If this is not true, this field equals the value

calculated by Total Tax Liability minus Income Tax After Credits

Element Number	Definition	
119	Combined Capital Gains (combined net Capital Gain Less Loss). Sum of Line 19, Schedule D, plus 2.5 times Line 14, Form 1040.	
120	Combined Capital Gains (combined Long-Term Gains Included in AGI). If Net Short-Term Capital Gain are positive, the difference between Line 19, Schedule D and Excluded Long-Term Gains (Ell9 above). If Net Short-Term Capital Loss, subtract Line 8, Schedule D from above.	٠
159 <b>-</b> 160	<ul> <li>(a) Decimal - A method of estimation by dividing the computer population count of returns in a sample stratum by the number of sample returns for that stratum (carried to 2 decimal places) The decimal place is implied. If used, divide by 100.</li> <li>(b) Integer - A method of estimation in which the decimal weight is converted to an integer weight and then applied to each return.</li> </ul>	

TECHNICAL DESCRIPTION OF THE FILE

# TECHNICAL DESCRIPTION OF THE FILES

Each "data record" in the file, representing one tax return, is composed of 1,680 characters. Blocks are made up of 6 data records and are separated by a 3/4 inch "inter record gap" (IRG). There is no special indication at the end of a block other than the IRG, and no indication of the end of a data record.

Tape characters are recorded in either EBCDIC or Interchange on standard 2,400 foot, 1/2 inch, nine-track tape, and a density of 6,250 bytes per inch (BPI). In this mode, a 1-bit and 0-bit are recorded as signals of opposite polarity in ODD parity (a parity bit is set to 1 or 0 so that there is always an ODD number of 1-bits in a nine-bit character).

Each code and data field is numeric and defined in character format. All codes are unsigned. The data fields are signed positive or negative, whichever is appropriate, in the last character position of the field.

Codes are defined as 2 characters in length. The largest decimal value is 99 with leading zeroes. The fields in the file are 10 characters in length with leading zeroes. Weight factors are provided to accommodate either a decimal or an integer weighting system.

The file is a single data set on multiple volumes and is UNLABELLED (EBCDIC) or LABELLED (Interchange).

## INDIVIDUAL TAX MODEL SAMPLE DESCRIPTION

## Sources of the Data

The data in the 1984 Individual Tax Model file were compiled from a stratified probability sample of unaudited individual income tax returns, Forms 1040, 1040A, and 1040EZ, filed by U.S. citizens and residents. The sample was designated at the National Computer Center and was processed in each of the ten Internal Revenue Service Centers during Calendar Year 1985. The total sample of 94,385 returns was selected from a population of 99,438,708 returns.

The estimates that could be obtained from this file are intended to represent all returns filed for Income Year 1984. While most of the returns processed during 1985 were for Calendar Year 1984, a few were for prior years. Returns for prior years were used in place of 1984 returns received and processed after December 31, 1985. This was done on the assumption that the characteristics of returns not yet filed could best be represented by the returns for previous income years that were processed in 1985.

All returns processed during 1985 were subjected to sampling except tentative and amended returns. Tentative returns were not subjected to sampling because the revised returns may have been sampled later on, while amended returns were excluded because the original returns had already been subjected to sampling.

## Sample Criteria and Selection

Form 1040, 1040A and 1040EZ returns filed and processed into the Internal Revenue Service's Individual Master File System at NCC during 1985 were stratified, by computer, into 33 sample strata based on: the presence or

absence of a Schedule C, Profit (or Loss) from Business or Profession; presence of Schedule F, Profit (or Loss) from Farms; the larger of total income or loss, and the size of business plus farm receipts; size of Positive Amounts Total income (the sum of specified income amounts valued greater than zero) or the size of Negative Amounts Total income (the sum of loss amounts only). Returns were then selected from the sample strata using the coding digits of the Social Security Number (SSN) at rates ranging from 0.02 percent to 100 percent.

#### Method of Estimation

Sampling weights were obtained by dividing the computer population count of returns filed per sample stratum by the number of sample returns actually received for that stratum. All decimal sampling weights were then converted to "integer weighting factors," which were placed on each sample return. For example, if a decimal weight of 44.24 was computed for a stratum, 24 percent

of the sample returns in the stratum were systematically given a weighting factor of 45, and 76 percent a weight of 44. The file can be weighted with either decimal or integer weights.

# Processing and Management of the Sample

While the sample was being selected, the selection process was monitored by applying prescribed sampling rates for each stratum to the population count for that stratum. A follow-up was required to reconcile differences between the actual number of returns selected and the expected number.

In transcribing and tabulating the information from the returns in the sample, checks were imposed to improve the quality of the resulting estimates. Incorrect or missing entries on the sampled record were altered during statistical editing to make them consistent with other entries on the return and accompanying schedules. Data were also adjusted during editing in an attempt to achieve consistent statistical definitions. For example, a taxpayer may report director's fees on the other income line of the Form 1040 return. If this situation had been detected during statistical editing, the amount of director's fees would have been entered into the salaries and wages field to the sample record.

Quality of the basic data abstracted was controlled at the processing centers by means of a continuous verification system that used computer tests to check for mathematical errors and inconsistencies in the data. These tests were performed while the returns were still available to aid in resolving the error conditions. Prior to tabulation of the data at the IRS Data Center, additional computer tests were applied to each return record to determine the need for adjustments to the data. Also, as a further check on processing, the IRS Data Center conducted an independent reprocessing of a small subsample of the returns previously processed for the study.1/

For more details on the techniques used to process the returns in the sample, particularly those steps designed to ensure the quality of the statistical data, see:

FEDERAL TAX FORMS (ELEMENT REFERENCE NUMBERS)

## FIELD NUMBERS

Field Numbers presented on the tax forms and schedules lines can be used to cross reference to the Core Record Layout. An example of this is line 7 on the Form 1040 which has a field number of 2.

# 7 Wages, salaries, tips, etc.----2

On the Core Record Layout it would appear as 2 to the left of the Salaries and Wages line. See example below.

- -- Core Record Layout --
- 1. ADJUSTED GROSS INCOME (DEFICIT) (AGI) (+/-) 2. SALARIES AND WAGES  $\underline{2}/$
- 3. INTEREST RECEIVED
- DIVIDENDS RECEIVED

Another example, Line 8 (a), Interest Income, on the Form 1040 (see below) has a field number of 3. This field number is cross referenced to the Interest income line on the Core Record Layout, which contains the number 3 to the left of the line (see above).

8a Interest Income ----- 3

Part I—Interest Income

Part II—Dividend Income

Part III—Deduction for a Married Couple When Both Work

Part IV—Credit for Child and Dependent Care Expenses

ame(s)	asst	nown	on Fo	rm	1040A

Your social security number

### You MUST complete and attach Schedule 1 to Form 1040A if you:

- Have over \$400 of interest income (complete Part I)
- Have over \$400 of dividend income (complete Part II)
- Claim the deduction for a working married couple (complete Part III)
- Claim the credit for child and dependent care expenses (complete Part IV)

## Part I Interest income (See page 15)

Complete this part and attach Schedule 1 to Form 1040A if you received over \$400 in interest income. If you received any interest from an All-Savers Certificate (ASC), use Form 1040 instead of Form 1040A.

List name of payer	Amount

	3	1 2 3	1 2 2 3 3

6	Compare the amounts in columns (a) and (b) of line 5. Write the smaller amount here. (Write either amount if 5(a) and 5(b) are exactly the same.) <b>Do not write more than \$30,000</b>	6	
7	Percentage used to figure the deduction (10%)	7	ж .10
8	Multiply the amount on line 6 by the percentage on line 7. This is the amount of your deduction. Write the answer here and on Form 1040, line 30	8	

# Instructions

Complete this schedule and attach it to your Form 1040 if you take the deduction for a married couple when both work. You may take the deduction if both you and your spouse:

- work and have qualified earned income, and
- file a joint return, and
- do not file Form 2555 to exclude income or to exclude or deduct certain housing costs, and
- do not file Form 4563 to exclude income.

There are three steps to follow in figuring the deduction on Schedule W.

Step 1 (lines 1, 2, and 3).—Figure earned income separately for yourself and your spouse.

Step 2 (lines 4 and 5). — Figure qualified earned income separately for yourself and your spouse by subtracting certain adjustments from earned income.

Step 3 (lines 6, 7, and 8).—Figure the deduction based on the smaller of:

- the qualified earned income entered in column (a) or (b) of line 5. whichever is less, OR
- \$30,000.

Earned income. — This is generally income you receive for services you provide. It includes wages, salaries, tips, commissions, certain disability income, sub-pay, etc. (from Form 1040, line 7). It also includes income earned from self-employment (from Schedules C and F of Form 1040 and Schedule K-1 of Form 1065), and net earnings and gains (other than capital gains) from the disposition, transfer, or licensing of property that you created. Earned income does not include interest, dividends, social security or tier 1 railroad retirement benefits, IRA distributions, unemployment compensation, deferred compensation. or nontaxable income. It also does not include any amount your spouse paid you.

Caution: Do not consider community property laws in figuring your earned income.

**Oualified earned income.**—This is the amount on which the deduction is based. Figure it by subtracting certain adjustments from earned income.

These adjustments (and the related lines on Form 1040) are:

- Employee business expenses (from line 25).
- Payments to an IRA (from line 26a).
- Payments to a Keogh plan (from line 27).
- Repayment of supplemental unemployment benefits (sub-pay) included in the total on line 31. See the instructions on repayment of sub-pay on page 12 of the Form 1040 Instructions.

Enter the total of any adjustments that apply to your or your spouse's earned income in the appropriate column of line 4.

Example. —You earned a salary of \$20,000 and had \$3,000 of employee business expenses (line 25 of Form 1040). Your spouse earned \$17,000 and put \$1,000 into an IRA (line 26a of Form 1040). Your qualified earned income is \$17,000 (\$20,000 minus \$3,000) and your spouse's is \$16,000 (\$17,000 minus \$1,000). Because your spouse's qualified earned income is less than yours, the deduction is figured on your spouse's income. Therefore, the deduction is \$1,600 (\$16,000 x .10).

Department of the Treasury

Credit for Child and Dependent Care Expenses

Attach to Form 1040.

OMB No. 1545-0068

Internal Revenue Service (X) Name(s) as shown on Form 1040 See Instructions below.

Your social security number 1 Write the number of qualifying persons who were cared for in 1984. (See the instructions below for the definition of qualifying persons.) 2 If payments listed on line 3 were made to an individual, complete the following: a If you paid \$50 or more in a calendar quarter to an individual, were the services performed in your home? Yes No b If "Yes," have you filed appropriate wage tax returns on wages for services in your home (see instructions for line 2)? 2b 3 Write the amount of qualified expenses you incurred and actually paid in 1984, but do not write more than \$2,400 (\$4,800 if you paid for the care of two or more qualifying persons) 4 You must write your earned income on line 4. See the instructions for line 4 for the definition of earned 134 • If you were unmarried at the end of 1984, write your earned income on line 4, OR If you are married, filing a joint return for 1984, a write your earned income \$ ....., and **b** write your spouse's earned income \$ . . . . , and c compare amounts on lines 4a and 4b, and write the smaller of the two amounts on line 4. 135 5 Compare amounts on lines 3 and 4, and write the **smaller** of the two amounts on line 5 . . . . . 5 6 Write the percentage from the table below that applies to the adjusted gross income on Form 1040, 136 If line 33 is: Percentage is: If line 33 is: Percentage is: Over-**But not** Over-**But not** overover-0-\$10,000 30% (.30) \$20,000-22,000 24% (.24) \$10,000-12,000 29% (.29) 22,000-24,000 23% (.23) 12,000-14,000 28% (.28) 24,000-26,000 22% (.22) 14,000-16,000 27% (.27) 26,000-28,000 21% (.21) 16,000-18,000 26% (.26) 28,000 20% (.20) 18,000-20,000 25% (.25) 7 Multiply the amount on line 5 by the percentage shown on line 6, and write the result. 7 8 Multiply any child and dependent care expenses for 1983 that you paid in 1984 by the percentage that applies to the adjusted gross income on Form 1040, line 33, for 1983. Write the result. (See line 8 instructions for the required statement.) 9 Add amounts on lines 7 and 8. Write the total here and on Form 1040, line 41. This is the maximum 137 amount of your credit for child and dependent care expenses.

## **General Instructions**

Paperwork Reduction Act Notice.—We ask for this information to carry out the Internal Revenue laws of the United States. We need it to ensure that taxpayers are complying with these laws and to allow us to figure and collect the right amount of tax. You are required to give us this information.

## What Is the Child and Dependent Care Expenses Credit?

You may be able to take a tax credit for amounts you paid someone to care for your child or other qualifying person so you could work or look for work in 1984. The credit will lower the amount of your tax. The credit is based on a percentage of the amount you paid during the year. The most you may take as a credit is \$720 if you paid for the care of one qualifying person, or \$1,440 if you paid for the care of two or more qualifying persons.

Additional information.—For more information about the credit, please get Publication 503, Child and Dependent Care Credit, and Employment Taxes for Household Employers.

# Who Is a Qualifying Person?

A qualifying person is any one of the following persons:

- Any person under age 15 whom you claim as a dependent (but see the special rule later for Children of divorced or separated parents).
- Your disabled spouse who is mentally or physically unable to care for himself or herself.
- Any disabled person who is mentally or physically unable to care for himself or herself and whom you claim as a dependent, or could claim as a dependent except that he or she had income of \$1,000 or more.

Children of divorced or separated parents. -- If you were divorced, legally separated, or separated under a written agreement, you may be able to claim the credit even if your child is not your dependent. Your child is a qualifying person if all four of the following apply:

- You had custody for the longer period during the year; and
- 2. The child received over half of his or her support from one or both of the parents; and
- 3. The child was in the custody of one or both of the parents over half of the year;
- 4. The child was under age 15, or was physically or mentally unable to care for himself or herself.

#### **General Instructions**

(Section references are to the Internal Revenue Code.)

Paperwork Reduction Act Notice. -- We ask for this information to carry out the Internal Revenue laws of the United States. We need it to ensure that taxpayers are complying with these laws and to allow us to figure and collect the right amount of tax. You are required to give us this information.

Purpose of Form. — The Tax Reform Act of 1984 revised and rearranged the order of many of the income tax credits. Beginning in 1984, there is a new "general business" credit" consisting of the investment credit

For information on investment credit, see Form 3468, Computation of Investment Credit, or Publication 572, Investment Credit.

For information on jobs credit, see Form 5884, Jobs Credit, or Publication 906. Jobs and Research Credits.

For information on the alcohol fuel credit, see Form 6478, Credit for Alcohol Used as Fuel.

For information on the ESOP credit, see Form 8007, Credit for Employee Stock Ownership Plan.

Carryback and Carryforward of Unused Credit.— If you cannot use all of your 1984 general business credit because the current

Line 10c.—Other filers.—Before you can claim the general business credit against your income tax liability, you must reduce this tax liability by the credits listed below:

- Personal credits
- Foreign tax credit
- Possessions corporation tax credit
- Orphan drug credit
- Nonconventional source fuel credit
- Research credit

Line 12.—If your adjusted tax liability (line 11) is \$25,000 or less, your general business credit is limited to that liability. If the tax liability is more than \$25,000. your credit is limited to \$25,000 plus
