## INTRODUCTION

The Internal Revenue Service 1992 Public Use Tax File, which contains 93,262 records, was selected as part of the Statistics of Income program designed to tabulate and present statistical information for the 113.6 million Form 1040, Form 1040A, and Form 1040EZ Federal Individual Income Tax Returns filed for Tax Year 1992.

The Tax Files which have been produced since 1960, consist of detailed information taken from actual tax returns. The public use versions of these sample files are sold in an unidentifiable form, with names, Social Security Numbers (SSN), and other identifying information omitted. The primary uses made of these files have been to simulate the administrative and revenue impact of tax law changes, as well as to provide general statistical tabulations relating to sources of income and taxes paid by individuals.

The Individual Tax File is designed for making national level estimates. The 1992 Tax File can be purchased through the Internal Revenue Service, Statistics of Income. Any questions concerning the cost and acquisition of the current Individual Tax File should be directed to:

Individual Tax Files for each of the Tax Years 1960, 1962, and 1966 through 1978 are available through the National Archives and Records Administration. Questions concerning cost, acquisition, and delivery of these historical tax files, should be addressed to:

Reference Services  
Center for Electronic Records, (NSXA)  
National Archives and Records Administration  
8601 Adelphi Road  
College Park, MD 20740-6001  
(301) 713-6630

The Archives order number for any of the above-mentioned historical Tax Model Files is 374-109-(A). Besides the order number, the requester should also specify the tax year and version (Individual or State) of the file under consideration.

Please refer to the sections of this booklet titled "Individual Tax File Sample Description" for a more detailed discussion of the Tax File.

## DISCLOSURE AVOIDANCE PROCEDURES

To preserve the character of the microdata file while also protecting the identity of individuals, we have incorporated the following procedural changes in the Individual Tax File.

First, to make sure that it will be impossible to learn whether a given taxpayer is represented in the sample, we have subsampled our 100 percent sample<sup>1</sup> at a 33 percent rate.

Second, those records that remain in our file from the 100 percent sample have been combined with other high income returns for the following processing changes:

As in past years, the State codes and all other geographic indicators have been removed for all high income records. Other codes and fields removed for these returns include: age and blindness indicators (for both primary and secondary taxpayers), alimony paid, alimony received, and personal property tax. Also, certain codes (age status, marital status, and exemptions for children living at home) have been modified (see section on Code Definitions for specific changes).

Then, all of the high income returns have been sorted from largest to smallest for the field "State and local income taxes deductions". In this field, for every three records, in descending order, the average State and local income taxes deduction has been determined and that value has been placed in the State and local income tax deduction field for each of the three records. This has been done over that part of the sample containing non-zero values in these fields. If the last group of records contains fewer than three, these records have been combined with the group of three immediately before it. This method of disguising data is called "blurring".

High income returns have then been separated into 35 different classes based on age, marital status, the number of children living at home, and the size of salaries and wages. Within each of these 35 classes, returns have been sorted on salaries and wages. This field has then been blurred over consecutive records as described above for State and local income tax

---

<sup>1</sup>Returns sampled at 100 percent include those with total income or loss of \$5,000,000 or more; those with business plus farm receipts of \$50,000,000 or more; and nontaxable returns with adjusted gross incomes or expanded incomes of \$200,000 or more.

deductions. However, records have only been averaged with other records in the same class. Therefore, records within one of the 35 classes have not been averaged with records in any of the other 34 classes. The file was then sorted on real estate tax deductions (again, within the 35 classes), and the same blurring procedure has been repeated for real estate tax deductions.<sup>2</sup>

Third, all lower income returns (records with an adjusted gross income of less than \$200,000 and not from our 100 percent sample) have been blurred, nationally, for alimony paid and alimony received. Then, all lower income returns were sorted by State. After this sort, the records were blurred for real estate tax deductions, and State and local income taxes deduction (State of Wisconsin, only, for this last item) in the same manner as described above. The only difference between the processing of these records and that of the high income returns is that the lower income returns have been sorted for real estate tax deduction by individual state with no records from two different States being combined when averaging a field over a series of records.

Fourth, for all records on the file, the following changes have been made:

The fields containing other net income or loss, total adjustments, foreign housing adjustment, total taxes paid, personal property tax, industry code, primary social security number, and secondary social security number have been deleted and marked as "reserved." Also, all fields on the file have been rounded to the four most significant digits (e.g., \$14,371 = \$14,370 and \$228,867 = \$228,900).

The following table shows the number of returns in the sample for each State, and the number not State-coded for disclosure reasons as described above.

Since individual records in this file may or may not contain data from just one tax return--and, anyway, never contain the full item content of any one tax return--we request that researchers make these facts clear in publishing their findings. In particular, they should refrain from using any language that would imply that they had access to individual taxpayers' records.

**EXPLANATION OF FIELDS NOT ABSTRACTED DIRECTLY FROM TAX FORMS**  
**1992 INDIVIDUAL PUBLIC USE TAX FILE**

The following explanations define data fields contained in the 1992 Individual Tax File that have not been abstracted directly from a specific line on Forms 1040, 1040A, 1040EZ, or the accompanying schedules and forms. Field numbers not appearing in this section have been entered on the specific lines on the forms or schedules from which the data were abstracted. Refer to the "1992 Federal Tax Forms" section of this booklet for further information.

Field  
Number

Definition

- 30                      DEDUCTIONS  
This is either Total Standard Deduction or Total Itemized Deduction. Only one can appear on each return. (Note: If the taxpayer had no income, but still included the total itemized deductions for which he/she was eligible, this amount is shown in Field 30.)
- 33                      COMPUTED REGULAR TAX  
This is a computed amount arrived at by applying the Tax Rate Schedules to Taxable Income, without regard to the type of computation used by the taxpayer.
- 35                      INCOME SUBJECT TO TAX  
For taxpayers filing current year returns, "Income Subject to Tax" is identical to taxable income except for those dependents paying "kiddie" tax from Form 8615. For dependents filing Form 8615 (TXST = 4 or 8), this is the income taxed at the child's rate. For prior year returns, "income subject to tax" is computed by using the tax rate schedule to impute a hypothetical taxable income amount necessary to yield the given amount of tax reported.
- 36                      MARGINAL TAX BASE  
This is the amount of income subject to tax at the marginal tax rate applicable to the return (TXRT), using the 1992 Tax Rate Schedules for all returns. (See Income Subject to Tax).
- 37                      Tax generated (from tax rate tables) on income subject to tax.

Field  
Number

Definition

- 38 TOTAL TAX CREDITS (SOI)  
Total credits from Form 1040 (line 45) or 1040A (line 24c) plus the amount of Earned Income Credit used to offset Income Tax before Credits.
- 50 TOTAL INCOME TAX  
Income Tax After Credits (F51) plus Alternative Minimum Tax (F52).
- 51 INCOME TAX AFTER CREDITS (SOI)  
Income Tax after Credits from Form 1040 (line 46) or 1040A (line 25) minus the amount of Earned Income Credit used to offset Income Tax Before Credits. For Form 1040EZ, which does not allow for any credits or any other taxes, this is the same as "Total Tax Liability."
- 57 TOTAL TAX LIABILITY (SOI)  
Total tax liability (Form 1040, line 53, Form 1040A, line 27, Form 1040EZ, line 7) minus Advance Earned Income Credit (line 52, Form 1040) payments minus EIC used to offset Income Tax Before Credits minus EIC used to offset all other taxes except advance EIC.
- 64 TOTAL TAX PAYMENTS  
Total payments shown on the tax form, minus the total Earned Income Credit. (Form 1040 line 60 minus line 56). This is limited to zero if there is a refundable EIC.
- 69 Earned Income Credit Used to Offset Income Tax Before Credits  
This amount is the lesser of: Total Earned Income Credit or Income Tax Before Credits (F34) minus all credits except the Earned Income Credit.
- 70-71 If Total Earned Income Credit (EIC) is greater than Income Tax Before Credits (reduced by all credits except the Earned Income Credit), the following fields are computed:
- 70 - Earned Income Credit Used to Offset All Other Taxes Except Advance EIC, which is the lesser of:  
1. Total EIC minus Earned Income Credit used to offset Income Tax Before Credits (F69); or  
2. The sum of all other taxes (fields 52 through 56).
- 71 - Earned Income Credit Refundable Portion equals EIC minus F69 minus F70 (see above for definitions and conditions).

80	Total Home Mortgage Sum of Deductible home mortgage interest paid to financial institution(s), Schedule A line 9(a), and deductible home mortgage interest, paid to individual(s), Schedule A line 9(b).
109	Business receipts Line 3 plus line 6 of Schedule C.
141	Total of Self-Employment Income The sum of amounts shown for primary and secondary taxpayers on their individual Schedule SE. (line 6, long Form or line 4, short Form).
146	Earned Income Limitation The smaller of line 9 or 10, Form 2441.
152	Total Passive Losses (Form 8582) This is the combined amount of lines 1b and 2b, losses from Rental Real Estate Activities and losses from All Other Passive Activities.
157	Decimal Weight A method of estimation by dividing the computer population count of returns in a sample stratum by the number of sample returns for that stratum (carried to two decimal places). The decimal place is implied. All estimates derived with the help of this weight must be divided by 100.

TECHNICAL DESCRIPTION OF THE FILE  
1992 INDIVIDUAL PUBLIC USE TAX FILE

Each "data record" in the file, representing one tax return, is composed of **1,790 characters**. Blocks are made up of **12 data records** and are separated by a 3/4 inch "inter record gap" (IRG). There is no special indication at the end of a block other than the IRG, and no indication of the end of a data record.

Tape characters are recorded in either EBCDIC or ASCII on a 3480 standard IBM cartridge, however, the user can also request the data on a nine-track, 6250 bytes per inch (BPI) magnetic tape.

Each code and data field is numeric and defined in character format. All codes are unsigned. The data fields are signed positive or negative, whichever is appropriate, in the last character position of the field.

Codes are defined as 2 characters in length. The largest value is 99 with leading zeros. The fields in the file are 10 characters in length with leading zeros. Weight factors are provided to fit a decimal weighting system.

## 1992 INDIVIDUAL PUBLIC USE TAX FILE SAMPLE DESCRIPTION

### Sources of the Data

The data in the 1992 Individual Tax File were compiled from a stratified probability sample of unaudited individual income tax returns, Forms 1040, 1040A, and 1040EZ, filed by U.S. citizens and residents. The sample was designated at the Martinsburg Computing Center and was processed in each of the ten Internal Revenue Service Centers during Calendar Year 1992. The total sample of 93,262 returns was selected from a population of 113.6 million returns.

The estimates obtained from this file are intended to represent all returns filed for Income Tax Year 1992. While most of the returns processed during 1992 were for Calendar Year 1992, a few were for prior years. Returns for prior years were used in place of 1992 returns received and processed after December 31, 1992. This was done on the assumption that the characteristics of returns not yet filed could best be represented by the returns for previous income years processed in 1992.

All returns processed during 1992 were subjected to sampling except tentative and amended returns. Tentative returns were not subjected to sampling because the revised returns may have been sampled later, while amended returns were excluded because the original returns had already been subjected to sampling.

### Sample Design and Selection Criteria

Data from Forms 1040, 1040A, 1040EZ, 1040PC, and 1040TEL processed to the IRS Individual Master File System at the Martinsburg Computing Center during Calendar Year 1992 were classified, by computer, into sample strata. Initially, these data were used to assign a return record to one of 24 income classes based on the larger of positive income or negative income, and the usefulness of the return record for tax modeling purposes. The final sample strata were based on income class, the size of Adjusted Gross Income plus the absence of an income tax or Alternative Minimum tax and the size of business plus farm receipts, or the presence or absence of one or more of the following forms: a Form 2555, Foreign Earned Income; a Form 1116, Computation of Foreign Tax Credit; a Schedule C, Profit or Loss from Business or Profession; and a Schedule F, Farm Income and Expenses. Sixty variables were used to derive positive and negative income and 32 variables were used to decide the usefulness for tax modeling purposes. The end result was 145 strata identified by the sample code.

Returns were then selected from the sample strata using two methodologies. One method used certain ending digits of the social security number (SSN), and the second method used ending digits of numbers generated from transformations of the SSN. The sampling rates for the various strata ranged from 0.02 percent to 100 percent.

### Method of Estimation

Sampling weights were obtained by dividing the computer population count of returns filed per sample stratum by the number of sample returns actually received for that stratum (computation carried to two implied decimal places). The file can be weighted with decimal weights by dividing each weight by 100.

### Processing and Management of the Sample

While the sample was being selected, the selection process was monitored by applying prescribed sampling rates for each stratum to the population count for that stratum. A follow-up was required to reconcile differences between the actual number of returns selected and the expected number.

In transcribing and tabulating the information from the returns in the sample, checks were imposed to improve the quality of the resulting estimates. Incorrect or missing entries on the sampled record were altered during statistical editing to make them consistent with other entries on the return and accompanying schedules. Data were also adjusted during editing in an attempt to achieve consistent statistical definitions. For example, a taxpayer may report director's fees on the other income line of the Form 1040 return. If this situation had been detected during statistical editing, the amount of director's fees would have been entered into the salaries and wages field of the sample record.

Quality of the basic data abstracted was controlled at the processing centers by means of a continuous verification system that used computer tests to check for mathematical errors and inconsistencies in the data. These tests were performed while the returns were still available to aid in resolving the error conditions. Before tabulation of the data at the Detroit Computing Center, additional computer tests were applied to each return record to decide the need for adjustments to the data.<sup>1/</sup>

FEDERAL TAX FORMS  
(WITH FIELD NUMBERS REFERENCED)

FIELD NUMBERS

Field Numbers presented on the tax forms and schedules lines can be used to cross reference to the Core Record Layout. One example is line 7 on the Form 1040 that has a field number of 2.

---

7 Wages, salaries, tips, etc. ----- 2

---

On the Core Record Layout it would appear as 2 to the left of the Salaries and Wages line. See the example below.

-- Core Record Layout --

1. ADJUSTED GROSS INCOME (DEFICIT) (AGI) (+/-)
2. SALARIES AND WAGES
3. TAXABLE INTEREST INCOME
4. TAX-EXEMPT INTEREST INCOME

Another example, Line 8a, Taxable Interest Income, on the Form 1040 (see below) has a field number of 3. This field number is cross referenced to the Taxable Interest Income line on the 1992 Core Record Layout, which contains the number 3 to the left of the line (see above).

▶ Attach to Form 1040.

Name of person with self-employment income (as shown on Form 1040)

Social security number of person  
with self-employment income ▶

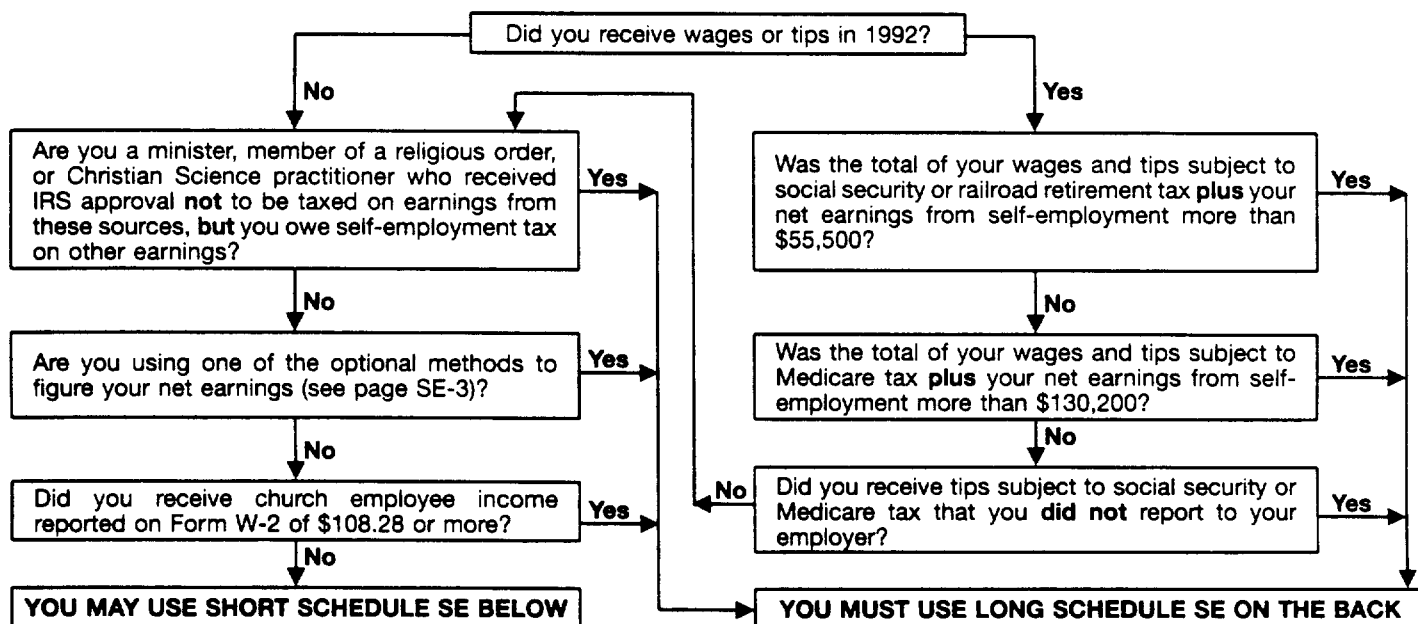

**Who Must File Schedule SE**

You must file Schedule SE if:

- Your wages (and tips) subject to social security AND Medicare tax (or railroad retirement tax) were less than \$130,200; **AND**
  - Your net earnings from self-employment from other than church employee income (line 4 of Short Schedule SE or line 4c of Long Schedule SE) were \$400 or more;
- OR**
- You had church employee income (as defined on page SE-1) of \$108.28 or more.

**Exception.** If your only self-employment income was from earnings as a minister, member of a religious order, or Christian Science practitioner, AND you filed **Form 4361** and received IRS approval not to be taxed on those earnings, DO NOT file Schedule SE. Instead, write "Exempt-Form 4361" on Form 1040, line 47.

**May I Use Short Schedule SE or MUST I Use Long Schedule SE?**

**Section A—Short Schedule SE. Caution: Read above to see if you must use Long Schedule SE on the back (Section B).**

### Paperwork Reduction Act Notice

We ask for the information on this form to carry out the Internal Revenue laws of the United States. You are required to give us the information. We need it to ensure that you are complying with these laws and to allow us to figure and collect the right amount of tax.

The time needed to complete and file this form will vary depending on individual circumstances. The estimated average time is:

- Recordkeeping** . . . . . 13 min.
- Learning about the law or the form** . . . . . 14 min.
- Preparing the form.** . . . . . 11 min.
- Copying, assembling, and sending the form to the IRS** . . . . . 10 min.

If you have comments concerning the accuracy of these time estimates or suggestions for making this form more simple, we would be happy to hear from you. You can write to both the IRS and the Office of Management and Budget at the addresses listed in the instructions for the tax return with which this form is filed.

### Purpose of Form

Interest expense paid by an individual, estate, or a trust on a loan that is allocable to property held for investment (defined on page 2), may not be fully deductible in the current year. Form 4952 is used to figure the amount of investment interest expense deductible for the current year and the amount, if any, to carry forward to future years.

For more details, get **Pub. 550, Investment Income and Expenses.**

### Who Must File

If you are an individual, estate, or a trust, and you claim a deduction for investment interest expense, you must complete and attach Form 4952 to your tax return, unless all of the following apply:

- Your only investment income was from interest, dividends, or capital gain distributions reported on Form 1040, line 14,
- You have no other deductible expenses connected with the production of interest, dividends, or capital gain distributions,
- Your investment interest expense is not more than your investment income, and
- You have no carryovers of investment interest expense from 1991.

### Allocation of Interest Expense Under Temporary Regulations Section 1.163-8T

If you paid or accrued interest on a loan and you used the proceeds of the loan for more than one purpose, you may have to allocate the interest paid. This is necessary because of the different rules that apply to investment interest, personal interest, trade or business interest, home mortgage interest, and passive activity interest. See Pub. 550.

## Specific Instructions

### Line 1—Investment Interest Expense

Enter the investment interest paid or accrued during the tax year, regardless of when the indebtedness was incurred. Include interest paid or accrued on a loan (or part of a loan) that is allocable to property held for investment.

Be sure to include investment interest expense reported to you on Schedule K-1 from a partnership or an S corporation. Include amortization of bond premium on taxable bonds purchased after October 22, 1986, but before January 1, 1988, unless you elected to offset amortizable bond premium against the interest payments on the bond. A taxable bond is a bond on which the interest is includible in gross income.

Investment interest expense does not include the following:

- Home mortgage interest,
- Interest expense that is properly allocable to a passive activity (see **Passive Activities** below),
- Any interest expense that is capitalized, such as construction interest subject to section 263A, or
- Interest expense related to tax-exempt interest income under section 265.

### Passive Activities

Investment interest expense does not include any interest expense that is taken into account in determining your income or loss from a passive activity. However, interest expense that is properly allocable to portfolio income is investment interest expense and is not taken into account when determining your income or loss from a passive activity. Portfolio income includes income (not derived in the ordinary course of a trade or business) from interest, dividends, annuities, royalties, and net gain from the disposition of property held for investment. See the instructions for Schedule E (Form 1040) for the definition of passive activity.

### Line 4—Net Investment Income

Net investment income is the excess, if any, of investment income over

**General Instructions**

(Section references are to the Internal Revenue Code.)

**Paperwork Reduction Act Notice.—** We ask for the information on this form to carry out the Internal Revenue laws of the United States. You are required to give us the information. We need it to ensure that you are complying with these laws and to allow us to figure and collect the right amount of tax.

The time needed to complete and file this form will vary depending on individual circumstances. The estimated average time is:

- Recordkeeping** . . . . . 1 hr., 33 min.
- Learning about the law or the form** . . . . . 1 hr., 3 min.
- Preparing the form** . . . . . 1 hr.
- Copying, assembling, and sending the form to the IRS** . . . . . 17 min.

If you have comments concerning the accuracy of these time estimates or

suggestions for making this form more simple, we would be happy to hear from you. You can write to both the IRS and the Office of Management and Budget at the addresses listed in the instructions of the tax return with which this form is filed.

**Purpose of Form**

Form 8801 is used by individuals, trusts, and estates to compute the minimum tax credit, if any, for alternative minimum tax (AMT) incurred in prior tax years after 1986. The form is also used to figure any minimum tax credit carryforward that may be used in future years.

**Who Should File**

Form 8801 should be completed by individuals, trusts, and estates that had:

- An AMT liability in 1991 and adjustments or tax preference items (other than exclusion items) in 1991;
- A minimum tax credit carryforward from 1991 to 1992; or

• A 1991 unallowed nonconventional source fuel credit or unallowed orphan drug credit (see the instructions for line 20).

**Recordkeeping.—**Use Form 8801 each year to see if you have a minimum tax credit and to keep track of any credit carryforward (see line 26 of your 1991 Form 8801).

**Specific Instructions**

The AMT is attributable to two types of adjustments and tax preference items—“exclusion items” and “deferral items.” The minimum tax credit is allowed only on the AMT attributable to deferral items.

**Deferral items** are generally adjustments and tax preference items that do not cause a permanent difference in taxable income over a number of years. An example is depreciation. **Exclusion items**, on the other hand, cause a permanent difference in taxable income. An example is the standard deduction.

Your social security number

**Caution:** • If you have a child who was born in 1992 and the amount on Form 1040A, line 17, is less than \$22,370, see **A change to note** on page 56 before completing this schedule.

• If you paid cash wages of \$50 or more in a calendar quarter to an individual for services performed in your home, you must file an employment tax return. Get **Form 942** for details.

**Part I**

**Persons or organizations who provided the care**

1	(a) Care provider's name	(b) Address (number, street, apt. no., city, state, and ZIP code)	(c) Identifying number (SSN or EIN)	(d) Amount paid (see page 57)

You **MUST** complete this part. (See page 57.)

(If you need more space, use the bottom of page 2.)  
**2** Add the amounts in column (d) of line 1. 2

**Next:** Did you receive employer-provided dependent care benefits?

- **YES.** Complete Part III on the back now.
- **NO.** Complete Part II below.

**Part II**

**Credit for child and dependent care expenses**

**3** Enter the number of qualifying persons cared for in 1992. You must have shared the same home with the qualifying person(s). See page 57 to find out who is a qualifying person. 3

**4** Enter the amount of **qualified** expenses you incurred and actually paid in 1992. See page 58 to find out which expenses qualify.  
**Caution:** If you completed Part III on page 2, **DO NOT** include on this line any excluded benefits shown on line 23. 4 145

**5** Enter \$2,400 (\$4,800 if you paid for the care of two or more qualifying persons). 5

**6** If you completed Part III on page 2, enter the **excluded benefits**, if any, from line 23. 6

**7** Subtract line 6 from line 5. If line 6 is equal to or more than line 5, **STOP HERE**; you cannot claim the credit. 7

**8** Look at lines 4 and 7. Enter the **smaller** of the two amounts here. 8

**9** You **must** enter your **earned income**. See page 58 for the definition of earned income. 9

**Note:** If you are not filing a joint return, go to "All other filers" on line 11 now.

**10** If you are filing a joint return, you **must** enter your spouse's earned income. If your spouse was a student or disabled, see page 59 for the amount to enter. 10

**11** • If you are filing a joint return, look at lines 8, 9, and 10. Enter the **smallest** of the three amounts here.  
• All other filers, look at lines 8 and 9. Enter the **smaller** of the two amounts here. 11 147

**12** Enter the amount from Form 1040A, line 17. 12

**13** Enter the decimal amount shown below that applies to the amount on line 12.

If line 12 is—		Decimal amount is—	If line 12 is—		Decimal amount is—
