Phone: +1 (267) 454-5534
Address: 3620 Locust Walk, Suite 3000. Philadephia, PA, 19104.

2 Course of study

I'm currently a second year PhD student in the Applied Economics program at Wharton. I have taken courses in Microeconomic Theory, Econometrics, Industrial Organization, Corporate Finance and Numerical Methods.

Currently I am working as a research assistant to professors Mike Abito and Arthur Van Benthem.

3 Research Interests

My research interests are in the field of Industrial Organization. In the past I've worked on estimating the effects of exclusivity contracts on entry. Currently I'm exploring different areas within IO, and digitization is certainly one that I would like to explore. At this stage of my career it would be very valuable to participate in this event and get exposed to the frontier of research in this area.

Without question this meeting would be useful to shape my future research agenda. To be in touch with the leading economists in this field would be a great learning experience.
