RECOMMENDATION LETTER FOR MR. ILIAS KANBAR

Dear Brett,

I am Max von Zedtwitz, a professor of strategy at the University of St. Gallen and a part-time professor of innovation and international business at Copenhagen Business School. I co-supervise **Ilias Kanbar** who pursues a PhD at the Université Jean Moulin Lyon 3 in France under the joint supervision with Professor Véronique Zardet.

Ilias has a master's degree in applied economics from Dijon, which included courses on economic analysis, health economics, econometrics, economics of innovation, industrial strategy, etc. As part of his doctoral training at Lyon, he had additional relevant courses such as innovation and growth in economics and management, ethics for researchers in economics and management, etc. While his PhD topic of « Reverse Innovation » is not a typical economics core subject, he is nevertheless trained and conversant in advanced economics theory and research, and he clearly immersed himself in innovation research.

I would therefore very much appreciate if you could consider Ilias Kanbar's application for the NBER Innovation Research Bootcamp in July 2026. If you have any questions, please do not hesitate to contact me.

Sincerely,

Prof. Dr. Max von Zedtwitz

Professor (part-time), International Management and Innovation (CBS)
Full Professor, Strategic Management, University of St. Gallen (HSG)
Director, GLORAD Center for Global R&D and Innovation (GLORAD)

In Lyon, 10/02/2026

Application for the NBER Innovation Research Boot Camp 2026

Dear Madam or Sir,

My name is Ilias Kanbar, and I am a fourth-year PhD candidate at Jean Moulin University Lyon 3 in France. My research lies at the intersection of innovation and international business, with a particular focus on reverse innovation (RI): innovations that are first adopted in developing countries and subsequently transferred to developed markets.

While the original definition of RI primarily adopts a market perspective, my work approaches the phenomenon from a product-centered perspective. Specifically, I shift the focus upstream toward pre-market activities. Although my empirical analyses are conducted at the firm level, my work draws extensively on economic literature, particularly in economic geography, global value chains, and the role of intangibles in value creation. My interest in economics dates back to my Master's degree in Applied Economics at the University of Burgundy, where I was trained in structural econometrics and quantitative economic analysis. Since then, even as my research has focused on firm-level dynamics, I have maintained a strong interest in macro-level processes and the spatial organization of innovation. This intellectual orientation has led me to actively engage with broader economic debates, including attending the 18th edition of the Journées de l'Économie (Jéco) in Lyon (November 2025).

Naturally, the NBER Innovation Research Boot Camp immediately attracted my attention, as its focus on the economics of innovation directly relates to the methodological and theoretical challenges I currently face. In particular, I analyze upstream innovation activities and their geographic distribution by examining firms' patenting behavior. I review patent data in an exploratory and descriptive manner, with attention to technological domains, the timing of inventive activity, and the international scope of filings. I also analyze selected backward and forward citations to document technological linkages and potential knowledge flows across regions.

Participating in this event would allow me to strengthen the empirical dimension of my work, particularly regarding the measurement of knowledge flows, the economic interpretation of patent-based indicators, and the development of more rigorous identification strategies. Engaging with scholars working at the intersection of innovation, trade, and economic development would help clarify and sharpen my contribution to the economics of globalization.

At this stage of my doctoral journey, I see the Boot Camp as a crucial step in consolidating my research agenda and aligning it more closely with advances in innovation economics.

Thank you very much for your time and consideration.

Best regards,
Ilias Kanbar

FIELDS OF EXPERTISE : Innovation, International Business, Reverse Innovation, Innovation from Emerging Markets, Healthcare

WORK EXPERIENCE

- Sep 2022 – Present **PhD Candidate in Management sciences**
  University Jean Moulin Lyon 3, Lyon
  Title : *Revisiting Reverse Innovation through the Lens of the Global Innovation Value Chain: Understanding Upstream Innovation Dynamics*
  Supervisors : Véronique Zardet/Max von Zedtwitz

- Apr 2022 – Aug 2022 **Research Assistant**
  Chair of Care Values, Lyon

- Feb 2019 – Jul 2019 **Internship - Health Economics Department**
  Ministry of Health, Rabat

- Nov 2018 – Dec 2018 **Internship - Financial Affairs Department**
  Ibn Sina University Hospital - Children's Hospital, Rabat

EDUCATION

- Feb 2024 – May 2024 **Visiting PhD Fellow**
  Copenhagen Business School
  Department of International Economics, Government and Business

- 2021 – 2022 **Research in Management**
  Emlyon Business School, Lyon
  Dissertation title: Reverse Innovation in a Healthcare Startup: an

analysis through the lens of the absorptive capacity theory

- 2020 – 2021 **Master 2 - Change Management in Territories, Healthcare Establishments, and Medico-Social Networks**
Iaelyon School of Management (With honors), Lyon
Dissertation title : The role of human and organizational factors in the development of the quality approach: a case study of a geriatric clinic

- 2019 – 2020 **Master 1 Applied Economics - Management and Evaluation of Healthcare Organizations**
University of Burgundy, Dijon
Dissertation title : "Healthcare Financing through obligatory health insurance in France and the Challenge of Financial Accessibility to Care"

- 2017 – 2019 **Master's Degree - Economics and Management of Healthcare (head of class)**
University Mohammed V Souissi, Rabat
Dissertation title : "Contribution of obligatory health insurance to the financing of the healthcare system in Morocco: a reflection on the levers of Universal Health Coverage"

- 2014 – 2019 **Bachelor's degree - Economics and Management**
University Mohammed V Souissi, Rabat

- 2013 – 2014 **High school – experimental sciences**
