A short description of the course of graduate study pursued and the years of enrollment in the PhD program;

- I have been enrolled in the Economics PhD program at the University Minnesota for 5 years and have been participating in the IO workshop there for 3 years.

A short description of research interests, any research projects that are in process, and when appropriate, a dissertation title, short description, and list of committee members.

- I am interested in studying IO, the effects of AI and digital platforms. I am a bit hesitant to describe what I am working on, but at least two papers are directly related to AI and platforms. Of the latter one is being written with Joel Waldfogel (he said it is ok to write his name here) and seems like it could be going public soon; I am writing the other with him and another person. I am also writing two papers on my own to include in my dissertation.

  The title of my dissertation is most likely going to be *"Two (Three?) Essays in Industrial Organization*, but this is probably not very informative.I would rather say in person what it is about. I can say however that at least one is related to digital platforms. My advisors are Tom Holmes and Joel Waldfogel.
